

IN THE CLAIMS:

1. CANCEL.

2. (Previously Presented) A wireless terminal as in claim 5,
 wherein the free-to-edit tag is visible to the user, and
 wherein the picture manager is capable of deleting the free-to-edit tag from the
picture.

3. (Previously Presented) A wireless terminal as in claim 2, wherein the picture
manager is also equipped to prompt the user regarding creating the free-to-edit tag, if the
user has created the picture.

4. (Previously Presented) A wireless terminal as in claim 5, wherein the free-to-edit
tag is visible to a user of the wireless terminal only if the wireless terminal is placed by
the user into a mode of operation allowing editing of an editable picture.

5. (Currently Amended) A wireless terminal for communicating pictures via a
wireless communication system, the wireless terminal comprising a picture manager,
responsive to signals indicating pictures, the picture manager being
 configured to display ~~for displaying~~ the pictures each of which is
 editable if indicated by a free-to-edit tag embedded in the picture,
 configured to examine ~~for examining~~ each of the pictures to
 determine whether each of the pictures includes the free-to-edit tag so as
 to be editable thus allowing a user to alter the content of at least a portion
 of the picture, and
 configured to enable ~~for enabling~~ editing of each of the pictures
 received by the user only if the free-to-edit tag is included in the picture
 received by the user,

wherein the wireless terminal further comprises a memory device, and a picture source for providing the signals indicating the pictures, and

wherein the picture manager automatically saves downloaded pictures including the free-to-edit tag in a different location in the memory device from where the picture manager saves downloaded pictures not including the free-to-edit tag.

6. (Previously Presented) A system, comprising:

- i) a wireless terminal for communicating pictures via a wireless communication system, the wireless terminal as claimed in claim 5; and
- ii) a base station transceiver, for providing communication between the wireless terminal and other communication devices.

7. (Previously Presented) A system, comprising:

- i) a wireless terminal for communicating pictures via a wireless communication system, the wireless terminal as claimed in claim 2; and
- ii) a base station transceiver, for providing communication between the wireless terminal and other communication devices.

8. (Previously Presented) A system, comprising:

- i) a wireless terminal for communicating pictures via a wireless communication system, the wireless terminal as claimed in claim 3; and
- ii) a base station transceiver, for providing communication between the wireless terminal and other communication devices.

9. (Previously Presented) A system, comprising:

- i) a wireless terminal for communicating pictures via a wireless communication system, the wireless terminal as claimed in claim 4; and
- ii) a base station transceiver, for providing communication between the wireless terminal and other communication devices.

10. (Previously Presented) A system, comprising:
- i) a wireless terminal for communicating pictures via a wireless communication system, the wireless terminal as claimed in claim 5; and
 - ii) a base station transceiver, for providing communication between the wireless terminal and other communication devices responsive to signals indicating pictures.
11. (Currently Amended) A system as claimed in claim 10, further comprising equipment providing pictures for downloading, for providing the signals indicating the pictures.
12. (Currently Amended) A method ~~for use by a wireless terminal~~ used in communicating pictures via a wireless communication system, the method comprising:
- an examination step, responsive to a picture, for examining the picture to determine whether the picture includes a free-to-edit tag, and
 - the method further comprising enabling editing of each of the pictures received by a user only if the free-to-edit tag is included in the picture received by the user.
13. (Previously Presented) A method as in claim 16,
- wherein the free-to-edit tag is visible to the user, and
 - wherein the method includes optionally deleting the free-to-edit tag from the picture.
14. (Previously Presented) A method as in claim 13, further comprising prompting the user regarding creating the free-to-edit tag, if the user has created the picture.
15. (Previously Presented) A method as in claim 16, further comprising a step of displaying the free-to-edit tag so that it is visible to a user only if the user places the wireless terminal into a mode of operation allowing editing of an editable picture.

16. (Currently Amended) A method for use by a wireless terminal used in communicating pictures via a wireless communication system, the method comprising:
 ~~an examination step,~~ responsive to a picture, ~~[[for]]~~ examining the picture to determine whether the picture includes a free-to-edit tag, and
 ~~the method further comprising~~ enabling editing of each of the pictures received by a user only if the free-to-edit tag is included in the picture received by the user
wherein ~~in the examination step,~~ a downloaded picture having the free-to-edit tag is automatically saved in a different location in a memory device from where a downloaded picture not including the free-to-edit tag is saved.

17. CANCEL.
